

Data Security Intelligence for the AI Enterprise

Enable AI everywhere with trust and control of your data across people and AI.

Built for modern data flows across:

Enable AI without losing control

Context-aware data intelligence wherever people and AI work.

DISCOVER

Intelligence starts with understanding your data

- ✓ Discover sensitive data across people and AI
- ✓ Visibility into data touchpoints and interactions
- ✓ Understand what data exists and why it matters

CONTEXT

Derive intelligence from how data is used

- ✓ Who or what is accessing the data
- ✓ How data is used, shared, or consumed
- ✓ Why access occurs—human or AI-driven

ENFORCE

Apply intelligence-driven control automatically

- ✓ Context-aware, adaptive policies
- ✓ Granular control for people and AI agents
- ✓ Protection that travels with the data

PROVE

Maintain visibility and proof across all surfaces

- ✓ Demonstrate compliance
- ✓ Continuous data visibility
- ✓ Support audit readiness

Actionable intelligence, not just visibility

Move beyond dashboards and reports. Turn data insight into real-time, enforceable control.

Persistent data security

ARMOR embeds intelligence into the data itself, ensuring trust and control persist wherever it moves.

Data security intelligence platform

Single control model

Persistent by design

Trusted by organizations that must protect sensitive data while scaling AI, collaboration, and innovation.

Edit
Download

When does access apply?

Time-bound access
Project or role-based duration

Where can access occur?

Approved systems
Managed environments

Continuous intelligence and proof

- ✓ Audit every interaction with sensitive data
- ✓ Continuous insight into access and behavior
- ✓ Context-aware enforcement in real time
- ✓ Track usage across people and AI systems
- ✓ Audit-ready evidence for compliance
- ✓ Instantly revoke or adapt access when risk changes

Enable AI and collaboration safely

Allow teams and AI systems to work with data freely, while intelligence-driven protection remains always on.

Context-Aware Intelligence

Turn Intelligence into Protection

As conditions change, protection adapts.

About Seclore

Seclore is the **Data Security Intelligence company** for the era of enterprise AI. As AI systems increasingly read, generate, and act on data without direct human oversight, organizations need more than visibility—they need intelligence, control, and proof.

Seclore ARMOR brings together data discovery, contextual intelligence, persistent protection, continuous enforcement, and usage insight within a single control model. By securing the data itself and ensuring protection travels with it, Seclore enables organizations to adopt AI confidently, demonstrate compliance continuously, and maintain trust across people, partners, and AI systems.
